MOBILE VETERINARY SURGERY

## **Surgical Consent Form for Medial patellar luxation (MPL) repair and Lateral Suture Stabilization (Extracapsular repair)**

Owner name: \_\_\_\_\_ Pet Name: \_\_\_\_\_  
Veterinary Hospital: \_\_\_\_\_  
Primary veterinarian: \_\_\_\_\_  
Patient age: \_\_\_\_\_ Breed: \_\_\_\_\_  
Patient sex: M MN F FS

\_\_\_\_\_ I have been given a copy of the MPL information sheet

\_\_\_\_\_ I have been notified of the diagnosis of a medial patellar luxation and suspect cranial cruciate ligament injury by Dr. \_\_\_\_\_ and informed of the different surgical and non surgical treatment options

\_\_\_\_\_ Surgery will be on the: Right \_\_\_\_\_ Left \_\_\_\_\_ (Please initial)

\_\_\_\_\_ I am aware that the prognosis for MPL surgery is usually excellent. The success rate varies from 90% for Grade 2 or 3 luxations to 70% for Grade IV luxations. I understand that, while the prognosis is excellent, guarantees are not being given. If implant migration or infection occurs, recovery can be delayed and implant removal may be recommended and further costs may be incurred. This is more likely in the patients with a grade IV luxation.

\_\_\_\_\_ I have been informed that over 50% of dogs will develop cruciate disease in the opposite limb within their lifetime

\_\_\_\_\_ Possible complications are uncommon but can include: anesthesia risks (including - very rarely - possible death), infection, nerve injury, hemorrhage, swelling and bruising, implant failure, fracture of the tibia, recurrence of patellar luxation

\_\_\_\_\_ Implant shifting or breakage can delay recovery

\_\_\_\_\_ Abiding by the post operative instructions is crucial for a proper recovery and to help avoid some of the above listed complications. Some of these complications will delay recovery and may necessitate further surgical intervention and expense

\_\_\_\_\_ I give consent to Dr. Cindy Eward of Synergy Mobile Veterinary Surgery to perform MPL correction and an extracapsular stabilization on my pet

Y / N I consent to photographs/video of my pet to be used by Synergy Mobile Veterinary Surgery for continuing education lectures, monitoring, case documentation and social media
